

## *The Global Dialogue Series* *University of Wisconsin-Madison*

The Global Dialogue series was initiated on campus by a small group of student service offices and organizations to bring international and domestic students together to discuss, debate, and exchange ideas on compelling issues facing communities, nations, and the world today in hopes of creating a vibrant and meaningful forum for exchanging perspectives, encountering difference in a respectful climate, growing in understanding of diverse global issues, and forging new friendships.

The first dialogue was held in the fall of 2003 and four sessions have been held each year since. Topics are selected by a planning committee based on ideas gleaned from past participant program evaluations. Topics to-date have focused on issues, such as race, identity, gender, social justice, security, foreign policy, media, globalization, politics, and film.
